

a) Injective and Non-Surjective

b) Surjective and Non-injective

c) Bijective

d) Non-surjective and Non-injective

3)

$$y-1 = mx$$

$$m = \frac{\sin\theta - 1}{\cos\theta}$$

Line equation:  $y-1 = \frac{\sin\theta - 1}{\cos\theta} x$

For  $y=0$

$$-1 = \frac{\sin\theta - 1}{\cos\theta} x$$

$$\Rightarrow x = \frac{\cos\theta}{1 - \sin\theta}$$

$$\neq s = \frac{\cos\theta}{1 - \sin\theta}$$
